1. *Pharmaceutical industry* – The pharmaceutical industry is a major contributor to the U.S. economy, with sales of over \$200 billion in 2000. The industry is characterized by high R&D costs, long development times, and high barriers to entry. The industry is also heavily regulated, with the FDA playing a central role in drug approval and oversight.

Figure 1 is a 10x10 grid of 100 small plots. Each plot contains a collection of small, dark, oval-shaped objects representing eggs. The distribution of eggs is non-uniform across the grid. Some plots have a high density of eggs, while others have a low density. The plots are arranged in a grid, with some plots labeled 'A' and 'W'. The labels 'A' and 'W' are placed in the top-left and top-right corners of the grid, respectively.

[illegible]

1. *Pharmaceuticals* – The pharmaceutical industry is a major contributor to the U.S. economy, with sales exceeding \$300 billion in 2004. The industry is heavily regulated by the FDA, which oversees the safety and efficacy of drugs. The industry is also heavily scrutinized by Congress and the public for its high prices and marketing practices.
